New Selection Tools

1.1 New Fabric System

With Multiple Selection tool, you can select multiple vertices and move them as a group by dragging them. You also can the selected vertices to pins by pressing 'W' key in your keyboard.

Objective

To select multiple vertices and move them.

Location

- Pattern Window Toolbar ->  icon

Operation

1. Click on the **Multiple Selection** tool according to the Location above
2. Drag your mouse cursor over garment to select vertices.
3. Move the selected vertices by dragging them.

All vertices that you selected move as a group. If you hold down 'Shift' key in your keyboard, you can select multiple group of vertices and move them all together.

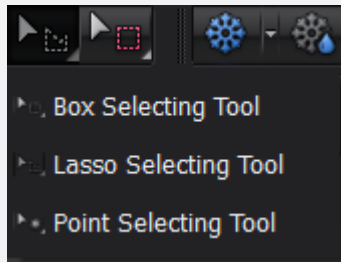

You also can turn the selected vertices into pins by pressing down 'W' key in your keyboard.

You can select multiple vertices on a garment. MD3 offers 3 methods of multiple vertices selection, Rectangular Marquee Select, Lasso Select and Point Select.

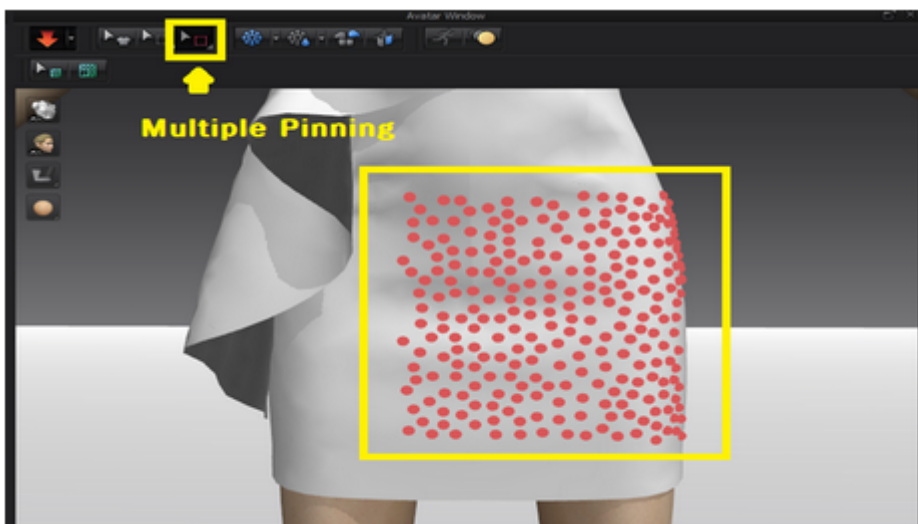

With **Rectangular Marquee Select**, you can select multiple vertices by dragging your mouse in any direction, then a rectangular marquee appears and highlights any vertices contained within it.

With **Lasso Select**, you can select multiple vertices by drawing a shape over garment then a gray dotted line appears and highlights any vertices contained within the shape that you draw.

With **Point Select**, you can select a single vertex by right mouse clicking over garment, then a green single point appears.

1.2 Multiple Pins

You can create multiple pins at a time and move them as a group.

Objective

To create multiple pins at a time.

Location

- Avatar Window Toolbar ->  icon

Operation
